

Fun with Fact or Fiction!

An exercise in learning what is true and what is false.

Step 1.) Gather three small pieces of paper and a writing utensil.

Step 2.) Look up TWO Fun Facts. These two facts can be about animals, space, the ocean, any topic you'd like, ***as long as they are 100% TRUE.***

Step 3.) Write the ***first*** fact on your first piece of paper and the ***second*** fact on the second piece of paper.

Step 4.) On your ***third*** piece of paper, make up a story that sounds true but ***is actually FALSE!***

Step 5.) When you are finished writing, scramble all three pieces of paper into a random order, then read them out loud to friends and family members. Ask them to guess which of the three is false! You can even read these fun facts over the phone or computer. **Keep track of everyone's guess!!!**

How many people did you fool with your fictional "fact"?
